

The View from the Press Box

Tim McGonagle

Six Man Football in Texas the documentary

I just watched the film, '[Six Man, Texas](#)' a true story of shrinking Texas towns. Awesome! The film gives an accurate picture of how the game is played and the difference in rules to the 11-man game.

What Coach Weaver was saying to his kids after the last game was great. It was super that he let you in the locker room and let you film that.

I am really glad you put in the film about the one kid from the town they beat that could bench press 315 pounds and run a 4.45 40 yard dash. That brought a wow factor. That was needed to let folks know the 6-man game is played by real football players.

A winning football team brings a small town together like nothing else, especially a town that has not won a playoff game in a long time. The only thing that brings a town closer is when you try to close their small rural school. The emotions of that attempt to close their school will last a lifetime. Just like the emotions of a winning football team and the memories that last a lifetime.

This film about the shrinking of small rural towns and schools will fit all the Midwest. It doesn't matter if it is 6-man or 8-man football or Texas or Kansas, we love to watch our kids in our small town against your kids in your small town play a tough physical game of football.

Thank you for giving me the privilege to watch and review your film. I hope you have a lot of visitors to your site and sell some films.

(My email back to the producer to allow me to watch and promote his movie.)
