

Grand Opening Specials

The Green Haus, 507 Ora, Scott City, Ks (620) 872-5309

March 19-31, 2010

These specials only good during the above dates.

Fertilome Weed Free Zone

There are lots of products on the market claiming they will kill weeds. Actually when this product first came out, I was extremely skeptical. The

Fertilome salesman told me this *Weed Free Zone* would work in cold weather. So I thought I would give the new product a test.

It was January when I got my hands on some and immediately mixed some up and went and sprayed on a 40 degree day with temperatures at night about 25 degrees. A few days later the weeds were dying. A couple weeks later they were gone. I was impressed.

When customers started taking this product home to use, one customer was so impressed he called the stuff 'Wow'! Actually, today he still does refer to *Fertilome Weed Free Zone* as 'Wow'!

Make sure to use Hi-Yield Spreader Sticker along with *Fertilome Weed Free Zone* so you get good coverage and the product will stick to the weed leaves better. Better coverage and stick means a better kill.

We now carry *Fertilome Weed Free Zone* in different size bottles. Quarts, pints, 8 ounce and Ready to Use bottles are all available. Lots of customers have been buying multiple bottles of *Weed Free Zone*, so we thought we could save you money by having it available in bigger bottles.

Cottonseed Compost

\$6.49 Bag

Regular \$8.99 Bag

Cottonseed compost is just what the doctor ordered to improve your heavy, gumbo, clay tight, cement like soils into the rich loamy, black soils we actually think of when gardening. This clay buster product is better than peat moss in our opinion and we have sold thousands of bags over the years. We use it as mulch at our house not just as a soil improvement. This special is only good on these dates March 19-31, 2010.

Tree Borer Killer

Fertilome Tree Systemic Insect Killer is a one time application per year product. It is absorbed by the tree or shrub to kill the borer inside the plant. *Fertilome Tree*

Systemic Insect Killer is a huge time saver. Measure your tree trunk and then mix the product in a bucket of water and pour at the base of the tree. Then start the water. It is as simple as that! Do it once this spring.

We have two gardens, one is in the backyard. The other, is the garden of life, it is your family. We seed, water, fertilize and pull weeds in both.

"We Grow our own, That's The Difference"

Bring this paper to the Green Haus it is your entry blank for a \$25.00 gift certificate
