

The 'New' Weed Cocktail

We have been selling the weed cocktail mixture for about 20 years at the Green Haus. You can control all broadleaf weeds and all annual grassy weeds at the same time with one spray with a hand pump type sprayer. Stickers, crabgrass, dandelions, spurge, bindweed just any weed can be destroyed with this one spray right in your turf grass. Today we have a new product 'Weed Out with Q' with both broadleaf and grassy killer mixed in one bottle. Make sure to use Hi-Yield Spreader Sticker when spraying. You will get a better knock down.

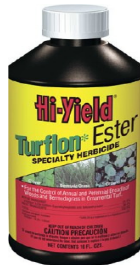

Milorganite

Are you ready to try something different on your lawn? Late in the summer does your lawn start to go yellow? For the past three summers on June 1st I have applied *Milorganite* on my yard the same day I apply my Season Long Grub control. This stuff works and this summer on June 1st it will be applied again. Are you ready to try something new and different? Come get a bag of *Milorganite* and try it on your front yard!

Bermuda Grass Killer

If you want to maintain just a bluegrass or fescue yard and you have bermuda grass creeping in then this is the product you need. This stuff burns off the bermuda grass leaving the fescue or bluegrass alive. You should start spraying about June 1st and repeat every four weeks during the summer.

Pro Green

This is my all time best selling fertilizer. You can use it on the lawn, trees, shrubs, flowers, vegetables, roses anything that grows in the ground! Fertilome Pro Green has nitrogen, iron, sulfur and other minor nutrients. Pro Green is perfect for our high alkaline and high pH soils. If you have plants that are yellow and should be green come grab a bag of Pro Green. Are you following the Green Haus and Fertilome lawn care program? If so as we approach June 1st now is the time to apply Pro Green along with a bag of Season Long Grub control. Put on one then the other and start the water. Your next application will be next September.
