

## Scott City Field House

By Tim McGonagle [www.kansasprepfootball.com](http://www.kansasprepfootball.com)

Scott City built a new field house this year at Darner Field and it is ready for the first game of the season. We have some pictures of the new field house so this story will really be a picture tour. The old field house has been torn down. The visiting team will be in another building on the southeast side of the football field which is also brand new. The officials will also be in the new building southeast of the field.

There will be restroom facilities on the outside of this new building for the public on the north wall. The south wall of the field house will be the entry/exit door for the football team. The view above is from the east side of the football field standing on the track looking to the Northeast.

The open house was well attended with a good crowd showing up to eat hamburgers supplied by the Scott City Booster club and a scrimmage by the football team. Along with introductions of cheerleaders, drill team and football team. (More pictures below.)

The picture above is of bricks placed just south of the wall of the field house to commemorate and raise funds for the new building. There are lots of bricks and no way could we show them all in this small space. If you are an old Scott City Beaver, the field house fund raiser is still going on and you are welcome to put a brick in the wall so to speak with your particulars.

The plaque above lists the school board and major donors to the project. The plaque is on the south wall of the building just beside the door leading into the field house. (Pictures below is inside the building.)

As you walk in the building a long hallway has several doors on each side of it. One leads to the storage room and the other direction leads to the training room. But on the wall as you walk the hallway is the picture above of the Tradition of Champions. These plaques are of past players who have competed for the Mighty Beavers.

The picture above is of the training room.

The picture above is the middle of the building where the actual locker room is. Plenty of visitors showed up at the open house and took the tour of the new facility.

Here is a better view of the locker room. The final picture below is a close up of a locker.

We hope you have enjoyed the tour.
